ABOUT ME

I am about to graduate from the Information Technology major at the University of Information Technology. I have 1 year of working experience at Patsoft company as a Mobile Developer.
During my time there, I participated in developing mobile and web applications for many large clients, which helped me hone my programming, interface design, and project management skills. As a fast learner with good adaptability and a strong commitment to completing tasks, I am eager to join a professional working environment to continue developing myself and contributing to the company.
In addition to my technical skills, I also have good communication skills, work effectively in a team, and always maintain a positive attitude at work.

PROJECT

Notification System
04/03/2024 - 04/03/2024

- Github:
  - Mobile: *https://github.com/tuan220301/noti_mobile*
  - Admin:
    - FE: *https://github.com/tuan220301/noti_fe*
    - BE: *https://github.com/tuan220301/noti_be*
- Project Overview:
  - Admin:
    - Frontend: ReactJS + Tailwind
    - Backend: ElysiaJS running on BunJS
  - User:
    - Mobile: Flutter
  - Database: MongoDB
  - Other technologies:
    - Firebase:
      - Subscribe to channels for mobile notifications.
      - Admin uses FCM to send notifications to individual devices.
    - Docker:
      - Build images from local machine.
      - Deploy to server to run admin web and API.
  - Admin functionalities:
    - CRUD operations for aquaculture ponds.
    - Send notifications to individual devices.
    - Update pond status upon notification.
  - Mobile functionalities:
    - View information on aquaculture ponds.
    - Receive notifications from admin.

Speaker sales and management system
03/01/2024 - 04/30/2024

- This system consists of two main parts:
  - Admin:
    - Website: http://nmt.logit.id.vn:3001/
    - Tech: dotnet, mongo db for backend, and react js,,vite, tailwind, radix ui for frontend
    - A web application for CRUD operations on speakers, users, and blogs.
    - Each user will have specific roles and will only be able to access routers allowed by the admin.
    - Once created, blogs and products will be pushed to the client page.
  - Client:
    - Website: *https://loataixuong.com/*
    - Tech: nextjs,tailwind, radix, docker.
    - A web page where customers can directly view products and blog posts.
    - Customers can make payments through online payment methods such as VNPay.

- In addition, the system also has a basic docker for easy to deploy on server

Logisoft
6/2021 - 12/2021

- Url: https://demo.logisoft.app/#/login
- Develop FE logistics management system for goods distribution businesses

Hanbiro (Internship)
3/2023 - 5/2023

- I participated in the company's VORA project, which is a project to manage employees.
